

## **Best Practices: 2019-20**

- 1) Efficient energy use. Each classroom has enough windows so that there is basically no need of using electric bulbs inside the classrooms. This drastically decreases the energy consumption.
- 2) Education beyond the classrooms: It encompasses everything from the academic curriculum to music, dance, sports, community engagement, opportunities for performance and the outreach activities for the benefit of the community. Many of the college students participate in different levels of sports events.
