DEPARTMENT OF ECONOMICS

L**CKDOWN DIARY**

An e-pamphlet of Economics

**Editor
Dr. Trailokya Deka**

The e-pamphlet Lockdown Diary of Economics is an integrated edited version of students' first hand experiences derived during Covid-19 induced nationwide lockdown. Looking into the wakefulness of students due to the pandemic we kept intact the students mind in Economics and loaded them with home assignments. Lockdown Diary is a continuous process of such an initiative. Hope the respected readers will understand the mind and thinking of undergraduate level students. Each word of this Diary carry the heart beat of students only and the editor have done nothing except cutting the stencils and cyclostyling.

Volume : 1 (One)

Issue. : August, 2020

Lockdown Diary
is
Honestly Dedicated
to
all the
Former Teachers of Economics Department

Message from the Principal

I am happy to learn that Lockdown Diary an e-pamphlet is going to be released by Dr. Trailokya Deka, Assistant Professor Department of Economics of our college. It is the result of sincere efforts by Dr. Deka and his students who have contributed for this unique endeavour. Researches are going on continuously to trace the ontological causes of the virus causing the pandemic; still general discourse points revolves around the ever increasing harmful anthropocentric activities, our inefficiency to maintain a harmonious relationship with nature and malicious bio-weapon theories. India has a rich indigenous health care system and it is our apathy that we don't take pride in our ancient heritage which has restricted the mitigation of problems arising out of the pandemic. Whatever be the situation, the Lockdown Diary is a novel effort by the publisher to synthesize the views of under graduate students regarding the pandemic. It is not important what they have written. I think it is an humble exercise of their brain regarding Covid-19 and it's impact on people. I hope this publication will be a path maker for further publication in our college. I congratulate Dr. Deka, his students and Department of Economics of our college for this creative endeavour. I wish Lockdown Diary all success!

Dr. B. B. Panda
Principal
B.P. Chaliha College, Nagarbera
Kamrup, Assam

Message from the Head of the Department

It is our pleasure to engage the students of our department to keep them alert and busy so that they can feel the positive and negative impact of any situation emerged in a society. Thinking and attitude of the student community will reflect in the writings they put forward. I think it is a better initiative to explore the thoughts of mind in real terms in academic scenario. Apart from this such type of activities will encourage all the stakeholders for sharing their views for better understanding to uplift themselves. The impact of a new situation may be positive or negative for the society as a whole. But we should be careful to study the situation so that we would be able to find out the practical result of the same.

Lockdown Letter to My Dear Students

It is about the middle of March, 2020 when the students last went for class room teachings. Thereafter about five months are gone by during which students and academicians are sitting or working from home only. Specially, students are in great trouble whether they are in right track, whether they will have classes in near future, or what about their examinations and promotions. It is a Covid-19 induced puzzled situation for each and every student of the country. Similar situation have arise for all most all the students of the globe.

It is a period of pandemic. The virus-corona has been affecting people in 213 countries and territories of the world. First in November, 2019 the virus has taken shelter in Wuhan city, Hubei province of China and officially taken 4634 lives. Latter on World Health Organisation (WHO) identified it as Covid-19. From China to Italy, then the USA, Spain, Germany, India the virus is moving very fast in the globe. Already 7,58,391 (5%) people have died and 2,11,28,670 infected from the lethal disease in the world (as on 15th August, 2020). Medical professionals explained that the affects from the virus, SARS-Cov-2 (corona) is more severe than the other viruses attacked in the past period in the world as a whole. To control the spread of Covid-19 government in all parts declared national lockdown and announced compulsory social distancing and quarantine norms. Every type of transportation and international entry points are closed except the health emergencies in India. Thus the present pandemic is becoming serious for health and it has simultaneously affected the economy, social structure and feelings along with the education sector, green natural settings and the geography as a whole.

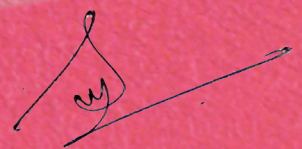

Affects in academics due to Covid-19 or Covid-19 induced lockdown is just like mixed in nature. Students are unfortunately sitting at home without class room teachings for the last five months and just remembering their lovely friends, libraries and play grounds a lot. They may be crazy to sit and eat at their canteens and shops. They might be remembering their teachers and internal examinations as well. At this crisis moment we the teachers are very sorry to see your academic loss and we are really helpless! As of now, we are incapable to help you to fulfil your young dreams. Uncertainties are still

moving everywhere in the society and academics. Human mind is blowing like anything, searching the ways to protect the life from corona virus or Covid-19. We would like to wish your bright future in the days to come. Stay safe my dear students!

Dear students, you might be getting home assignments from the teachers of your core subjects. Some of you might have submitted already and some might be doing. Enjoy doing the assignments with your creative young minds that will help you to pass the lockdown time in a meaningful way. Looking into the pandemic lead wakefulness of our students, me (Dr. Trailokya Deka) thought to keep intact the students' mind in Economics only and loaded them with home assignments. Topics are like, for 2nd Semester students, 'write at least 10 Socio-economic problems of your locality that arise due to current COVID-19 outbreak and national lockdown in India', for 4th Semester students, 'write at least 20 agricultural and non agricultural problems of your locality that arise due to current COVID-19 outbreak and national lockdown in India' and similarly for 6th Semester students 'write at least 20 Socio-economic problems of your locality that arise due to current COVID-19 and national lockdown in India, give respective solution for the problems' and they submitted their write-ups accordingly. My dear students, majority of you have responded and submitted the e-versions of your home assignments properly. Thanks for your cooperation. We understand the time, the time of pandemic. Keeping self responsibility of writings (respective author bear the responsibility of his/her own writings) you have recorded massive ground information at your local level during this pandemic period. To keep your lockdown feelings and experiences everlasting and to distribute it to the neighboring society and respected parents and guardians in original we mainly prepared this e-pamphlet Lockdown Diary. We hope our respected readers will understand the speaking of your unripe mind!

Lockdown period on the other side of academics is really become an opportunity to trace and crack for the students. Sitting happily with your parents you can easily access numbers of studies or explanations related to your syllabus. You can consult with different e-references or e-books. Question papers and answer books are also available online that you can easily access. You have enough time, maintaining your

scheduled online classes (if any) you may roam around the different digital platforms to use it in positive settings. Now it becomes very easy to talk and discuss with national as well as foreign academicians through webinars using different digital 'Applications' (Apps) like Zoom, Google Meet, Google Hangouts, Jio Meet, Webex Meet, Microsoft Teams etc. Credit goes to the Covid-19 induced lockdown compulsions but not to the present administrative mechanisms for which the digital Apps become much familiar to us. Only caution is that you need to first install the safety and security measures before using the stated Apps. You can use your android mobile devices or laptop or desktop for online access. Dear students please help each other; please take care of your class mates or friends who are unable to purchase a device for online access. This is a time of crisis, dear students don't go hurry. Don't waste your capacity or existing product/s. If possible please contribute something to the society; deprived section of the society is looking at you. Maintaining health immunity you finish up your syllabus topics and work for the deprived section of the society. Situations become so tough and complex that every one of you may not get chance to sit in examinations. Understanding of different topics contained in your syllabus is much more important than sitting in examinations, because you need to move towards the future and run the long life with a self dependent social identity. Teachers and other administrators will take care of your examinations and promotions. Don't worry, go systematic and win the precious life. Thank you all.

Impact of Covid-19 Lockdown at Milan Nagar, Nagarbera

Shahina Akhtar

BA 6th Semester

Department of Economics

Introduction:

Corona viruses (CoV) are a large family of viruses that cause illness ranging from the common cold to more severe diseases such as Middle East Respiratory Syndrome (Mars-CoV) and Severe Acute Respiratory Syndrome (SARS-CoV). Corona viruses are Zoonotic, meaning they are transmitted between animals and people.

Problems Associated:

The COVID–19 pandemic is the defining global health crisis of our time and the greatest global humanitarian challenge the world has faced since World War II. The virus has spread widely and the number of cases is rising daily as government work to slow it's spread. India has moved quickly, implementing a proactive, nationwide initial 21 days lockdown. After that India has extended it's lockdown period up to 2 weeks with the goal of flattening the curve and using the time to plan and resource responses adequately.

COVID–19 has triggered a deep social and economic crisis. Lockdown has affected our nation as well as our locality i.e. Milan Nagar, Nagarbera. Milan Nagar is about 800 meters far from Nagarbera bazar. In our locality there is one kali mandir. There is a PHC (primary health centre), Revenue circle office, police station and a central bank near to our locality.

Following are the Socio-economic problems arise in our locality due to Covid-19 and national lockdown–

- Due to lockdown farmers were unable to go to fields for their works. It is a transferable virus and when people come into the contact with the infected person, he or she will also be infected.
- Farmers cannot sell their crops and buyers also not able to buy crops for the imposed lockdown restrictions.
