Industrial Exposure Programme

Venue: Rani Industrial Area

Date: 10-11-2022

Total No. of Participants: 25

In a bid to provide students with hands-on learning experiences and bridge the gap between theory and practice, the Department of Economics of B.P. Chaliha College organized an enlightening industrial exposure programme to Rani Industrial Park on 10th November 2022. This initiative, undertaken in collaboration with industries of Rani Industrial Park, Rani, aimed to offer students and faculty members a firsthand glimpse into the workings of industrial operations and economic dynamics. All the students of honours participated in the programme under the guidance of all the teachers of the department. The industrial exposure programme provided participants with a comprehensive overview of the various industries housed within Rani Industrial Park. From manufacturing units to logistics and supply chain facilities, students and teachers had the opportunity to witness the intricate processes involved in industrial production and management. Led by experienced guides and industry experts, the programme included informative sessions, interactive workshops, and guided tours of key industrial facilities. Participants were able to engage directly with industry professionals, gaining valuable insights into industry best practices, technological advancements, and market dynamics. Moreover, the programme served as a platform for fostering meaningful interactions between academia and industry, facilitating knowledge exchange and collaborative opportunities. Students had the chance to showcase their academic prowess and engage in discussions on pertinent economic issues, while industry representatives provided valuable feedback and insights from a practical standpoint. The industrial exposure programme also underscored the significance of sustainable development and corporate social responsibility within the industrial landscape. Participants were briefed on initiatives undertaken by industries to minimize environmental impact, promote ethical business practices, and contribute to the socio-economic development of the region. Furthermore, the programme aimed to inspire students to explore career opportunities within the industrial sector and cultivate a deeper understanding of the role of economics in shaping industrial policies and strategies. Reflecting on the experience, both students and teachers expressed their appreciation for the invaluable insights gained during the industrial exposure programme. Many highlighted the practical relevance of the learning acquired and its potential to enrich their academic and professional

pursuits. Armed with newfound knowledge and perspectives, participants returned to B.P. Chaliha College with a renewed sense of enthusiasm and motivation.

In conclusion, the industrial exposure programme to Rani Industrial Park orchestrated by B.P. Chaliha College's Economics Department serves as a testament to the college's commitment to holistic education and experiential learning. By fostering synergies between academia and industry, the programme equips students with the skills, insights, and networks necessary to thrive in an ever-evolving economic landscape.
