

Report on Educational Tour to Manas National Park

Organized by the Department of Economics, B.P. Chaliha College, Nagarbera

Dates: 2nd and 3rd November 2024

The Department of Economics at B.P. Chaliha College, Nagarbera, organized an educational tour to Manas National Park on the 2nd and 3rd of November 2024. The tour was designed to provide students with an experiential learning opportunity to understand the socio-economic and environmental significance of biodiversity and eco-tourism.

The primary aim of the tour was to help students connect theoretical knowledge with real-world applications. By exploring the rich biodiversity of Manas National Park, students gained insights into eco-tourism, wildlife conservation, and sustainable development, all of which are crucial in development economics.

The tour included students from the 5th semester of the Department of Economics, accompanied by three faculty members: Anshuman Sikia, Associate Professor, Dr. Alaka Hujuri, Associate Professor and Minakshi Baro, Assistant Professor.

On 3rd November, the group participated in an early morning jeep safari. The safari offered an opportunity to witness the majestic wildlife of Manas, including elephants, rhinoceroses, and various bird species. The students were encouraged to note how conservation efforts contribute to the preservation of endangered species.

The educational tour was an enriching experience that combined learning with exploration, leaving students with a deeper appreciation of the interdependence between economics and the environment.
